

HOOKS STREET ALTERNATIVE CORRIDOR EVALUATION STUDY NEWSLETTER

Issue #1 – September 2020

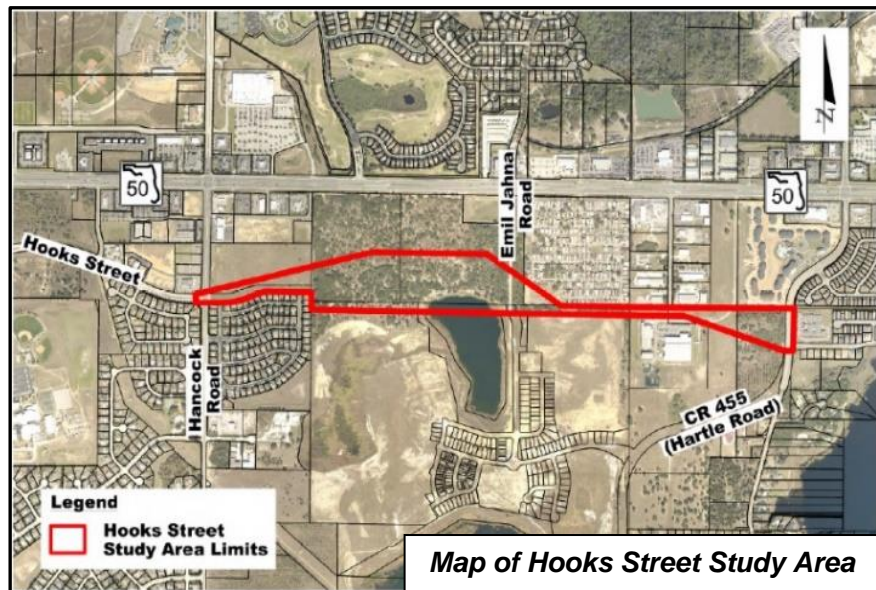

www.HooksStreetStudy.com

Lake County Launches the Hooks Street Alternative Corridor Evaluation Study

In March 2020, Lake County began the Hooks Street Alternative Corridor Evaluation Study to focus on determining the alternative alignments for the extension of Hooks Street from Hancock Road to Hartle Road (CR 455). The area being evaluated is in the City of Clermont and is approximately 1.4 miles in length.

The purpose of this study is to determine the location and conceptual design of feasible build alternatives for roadway improvements and their social, economic, and environmental impacts. As alternatives are identified and evaluated, the study team will consider this corridor's setting, the area's mobility needs, and the public's input. There

will be many opportunities for the public to share their ideas and concerns throughout the study through comment forms, the project website, and in person speaking opportunities. It is anticipated that this study will be completed by February 2021.

Upcoming Meeting(s)

Lake County will be holding an Alternative Concepts Public Workshop tentatively scheduled in October/November 2020. A formal invitation will be sent to all property owners and stakeholders within 300 feet of study area 2-3 weeks prior to the public meeting.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status.

Study Schedule

Key Study Activities	2020										2021	
	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	JAN	FEB
