Initial Alternative Concepts Developed

Based on data collection activities and stakeholder input, initial alternative concepts have been developed for the Hooks Street Alternative Corridor Evaluation (Study). These concepts focus on continuing proposed improvements on a new alignment from Hancock Road to Hartle Road (CR 455), a total length of 1.4 miles.

Each concept is being evaluated based on a number of factors including community character, the natural environment, parcel impacts, potential relocations, future travel needs, and cost.

These concepts and related evaluations will be presented on November 16, 2020 at the Alternative Concepts Public Workshop (see below for more details).

Alternative Concepts Public Workshop Scheduled for November 16, 2020
