Hooks Street Clermont City Council Preferred Alternative

In March 2020, Lake County began the Hooks Street Alternative Corridor Evaluation (Study) to focus on determining the alternative alignments for the 1.4-mile extension of Hooks Street from Hancock Road to Hartle Road (CR 455).

As a result of the detailed technical evaluations, the Study Team has identified the recommended alignment (shown below). This alternative extends existing Hooks Street on a new alignment from Hancock Road to Hartle Road (CR 455) in Lake County.

The Study Team evaluated two typical sections, a two-lane divided roadway with wider sidewalks and bike lanes and a hybrid section which is proposed to be constructed initially as a two-lane divided roadway that could be widened to a four-lane divided roadway in the future. The Study Team presented the merits of both typical sections to the Clermont City Council on January 26, 2021. The City Council relayed their preference for a four-lane divided roadway section. Previous alternatives including the City Council preference will be presented at the Public Hearing tentatively scheduled in early April 2021.

The City Council's preference of a four-lane section is depicted in the graphic shown below.

Study Schedule

Key Study Activities	2020										2021				
	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	JAN	FEB	MAR	APR	MAY
